PlayTiles®

Dinoflex PlayTiles® are specifically designed to reduce injuries from falls under the guidelines set out under the ASTM F1292 standards. These tiles are ideal for schools, parks, daycares, multi-family playgrounds, backyard play areas and can even be used with indoor or outdoor climbing walls. The unique interlocking system can easily be installed over concrete, asphalt or compacted gravel. In addition, these tiles provide you the option of incorporating designs and symbols into the surface to make it even more appealing to children – imagine hopscotch or the alphabet built right into your playground surface. Use Dinoflex PlayTiles® to create a fully accessible playground surface that can be used in virtually any weather and is tough enough to stand up to the most active children.
